DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-20, 26 and 26, drawn to a composition comprising bipotent hepatic progenitors, a method for treating a liver disorder by administration of human liver progenitors, and to a method for treating a genetic disorder by administration of bipotent hepatic progenitors harboring a gene which corrects a genetic disorder, classified in class 435, subclass 325, class 424, subclass 93.1, class 514, subclass 44 and class 424, subclass 93.21, for example.
- II. Claims 21-24, drawn to a method of obtaining a mixture of cells enriched in progenitors, and a method for the identification of progenitor cells, classified in class 435, subclass 4.

The inventions are distinct, each from the other because of the following reasons:

Invention I and Invention II are mutually exclusive and independent. The composition comprising the bipotent hepatic progenitors of Invention I can be obtained by different methods than the method of Invention II, for example the cells can be hand-sorted using confocal microscopy and detection methods well-known in the art.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

Art Unit: 1632

remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
